Project Name	Import Data using Transform Maps
Maximum Marks	2Marks

Customer Problem Statement Template:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow System Administrator / HR Operations Specialist	Bulk import external employee records from an Excel spreadsheet into our target table (Employee Test)	Manually creating each employee record one-by-one is extremely time-consuming and error-prone	The default platform does not populate custom fields automatically without a configured staging and mapping structure	Frustrated by inefficient, repetitive manual data entry and high risk of typographical errors.
PS-2	A Data Governance Manager	Ensure clean, duplicate-free employee data when uploading updated spreadsheets	Re-uploading spreadsheets creates duplicate employee entries in the database	There is no unique key (like Employee ID) set to update existing records instead of creating new ones	Anxious and concerned about poor data integrity, redundant database clutter, and inaccurate system reporting
