

Project Report: Milestone 1

Project Name: Import Data using Transform Maps
(Spreadsheet)

Milestone: Milestone 1 - Creation of Spreadsheet and Table

Assignee: Nardhana T K

Estimated Complexity & Duration: Medium | 40 Minutes

1. Executive Summary:

The primary objective of Milestone 1 is to set up the foundational environment for importing bulk structured employee data into the ServiceNow platform. This milestone involves preparing an external spreadsheet containing source records and constructing the custom target table schema within ServiceNow to store the incoming data accurately.

2. Completed Scope & Key Subtasks:

Subtask 1: Creation of External Source Spreadsheet

- * Description: Prepared an external spreadsheet (Sample Spreadsheet.xlsx) containing mock employee attributes required for target system mapping.

- * Fields Configured:

- * Employee ID (Primary Unique Identifier)

- * Name

- * Email

- * Department

- * Location

Subtask 2: Creation of Target Custom Table in ServiceNow

* Description: Configured the target table structure in ServiceNow to act as the permanent database repository for employee information.

* Table Details:

* Table Label: Employee Test

* Table Name: u_employee_test

* Application: Global

* Target Dictionary Fields Created:

* Employee ID (u_employee_id) — String

* Name (u_name) — String

* Email (u_email) — String

* Department (u_department) — String

* Location (u_location) — String

3. Verification & Validation:

* Schema Verification: Confirmed via System Definition > Tables that all target fields exist on the u_employee_test table with appropriate String data types.

* Form View: Layout updated to display all 5 essential fields on the form record view.

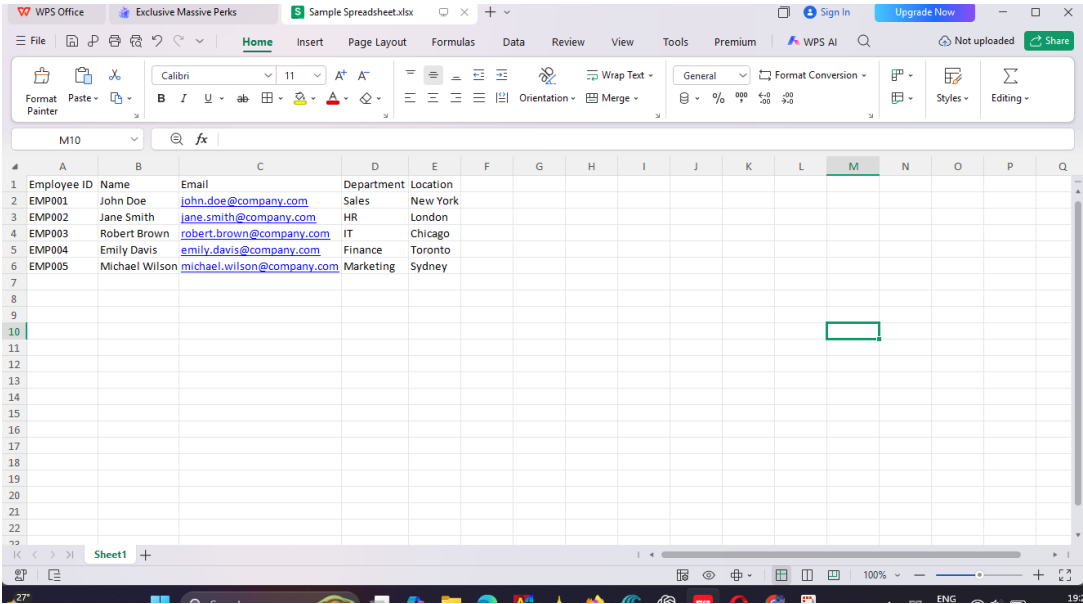

* Database State: Verified that u_employee_test.list displays empty initial rows ready for execution of data imports.

4. Next Steps

With Milestone 1 completed, the project moves to Milestone 2: Creation of Import Set Table and Transform Map, where data from Sample Spreadsheet.xlsx will be staged and mapped to u_employee_test.
