

Project Design Phase-II

Data Flow Diagram & User Stories

Date	28 september 2026
Team ID	SWTID-2026-4908
Project Name	Import Data using Transform Maps
Maximum Marks	4Marks

1. Data Flow Diagram (DFD - Level 1):

The flow chart visualizes the path of data from the external spreadsheet file to the target database table:

2.User Stories Template:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Administrator	Target Table Setup	USN-1	As an Administrator, I want to create a custom table Employee Test (u_employee_test) so that imported employee records can be stored safely	Table exists with custom string fields (Employee ID, Employee Name, Email, Department, Location).	High	Sprint -1
Data Ops Specialist	Data Staging	USN-2	As a Data Ops Specialist, I want to upload Sample Spreadsheet.xlsx via System Import Sets so that raw data is staged before processing.	Import Set staging table u_employee_import is populated with raw spreadsheet rows.	High	Sprint -1
System Admin	Transform Mapping	USN-3	As a System Admin, I want to create	All 5 source columns automatically	High	Sprint -1

			Employee Transform Map and use Auto Map Matching Fields so that source columns map automatically to target fields.	pair with corresponding fields on u_employee_test		
Data Governance Lead	Duplicate Prevention	USN-4	As a Data Governance Lead, I want to set Coalesce on Employee ID so that existing records are updated rather than duplicated.	Re-running the transform updates existing records if Employee ID matches, creating new records only when unique.	High	Sprint -2
System Admin	Execution & Verification	USN-5	As a System Admin, I want to run the transform script and review logs so that I can ensure 100% data ingestion accuracy.	Transform completes with state Complete and 0 errors reported in Import Set Run logs.	Medium	Sprint -2
