

Project Report: Milestone 2

Project Name: Import Data using Transform Maps
(Spreadsheet)

Milestone: Milestone 2 - Creation of Import Set Table and Transform Map

Assignee: Archana N

Complexity & Duration: Medium | 40 Minutes

1. Executive Summary

The primary goal of Milestone 2 is to establish the staging area and transformation logic for migrating external spreadsheet data into ServiceNow. This involved creating a temporary Import Set staging table and configuring a Transform Map to systematically link incoming source attributes to the target database fields.

2. Completed Scope & Key Subtasks

Subtask 1: Create Import Set Staging Table

- * Description: Uploaded the external spreadsheet to instantiate a temporary staging table in ServiceNow for raw data processing and validation.

- * Navigation Path: Application Navigator > System Import Sets > Load Data

- * Import Table Configuration:

- * Table Label: Employee Import

- * Table Name: u_employee_import (Auto-generated)

- * Source File: Sample Spreadsheet.xlsx

- * Outcome: Raw data successfully staged inside u_employee_import.

Subtask 2: Create & Configure Transform Map

* Description: Built a Transform Map rule to map raw fields from the staging table to their corresponding fields in the custom target table.

* Transform Map Details:

* Name: Sample Spreadsheet Import

* Source Table: u_employee_import

* Target Table: Employee Test (u_employee_test)

* Field Mapping Configuration: Executed field matching to establish key visual relationships:

* Employee ID \ Employee ID

* Name \ Name

* Email \ Email

* Department \ Department

* Location \ Location

3. Verification & Execution

*Transformation Trigger: Executed the Transform action from the Transform Map interface.

*Execution Status: Confirmed successful processing with a green completion status message in ServiceNow.

4. Screenshots

Importset Table:

The screenshot shows the 'Load Data' form in ServiceNow. The 'Import set table' section has 'Create table' selected. The 'Label' is 'Employee Import' and the 'Name' is 'u_employee_import'. The 'Source of the import' section has 'File' selected. The 'File' section shows 'Choose File' and 'Sample Spreadsheet.xlsx'. The 'Sheet number' is '1' and the 'Header row' is '1'. A 'Submit' button is at the bottom.

Import set table

- ☒ Create table
- ☐ Existing table

* Label: Employee Import

Name: u_employee_import

Source of the import

- ☒ File
- ☐ Data source

File: Choose File | Sample Spreadsheet.xlsx

Sheet number: 1

Header row: 1

Submit

Transform Map:

The screenshot shows the 'Mapping Assist' form in ServiceNow. The 'Source: Employee Import' section lists fields: Comment, Created, Created by, Department, Email, Employee ID, Error, Import set run, Location, and Name. The 'Field Map' section shows a mapping between 'Employee ID' and 'Employee ID', 'Name' and 'Name', 'Email' and 'Email', 'Department' and 'Department', and 'Location' and 'Location'. The 'Target: Employee Test' section is empty. The 'Data Viewer' section shows a table with 'Field' and 'Value' columns. The 'Employee Import' table has 'Comment' and 'Created by' fields. The 'Employee Test' table has 'Created by' and 'admin' fields.
